

JOURNALISM 350

Reporting on the Environment and Science

Fall 2009, Miami University Oxford Campus
T/Th 4:10 p.m.-5:25 p.m.

Gasoline dependence.
Water and air quality.
Preserving green space.
Recycling.
Global warming.
Ocean dead zones.
Protecting endangered species.
Organic or not?
Understanding nature.
The impact of chemicals on the human body.

Public interest in **global environmental issues** is enormous. Journalists and writers who can serve that audience are in demand. In this practicum, you will explore the above topics by learning from scientists, taking field trips and **producing multimedia “green” journalism** for local news media.

PRE-REQUISITE: Journalism 201 (Basic News Reporting and Writing) or instructor approval.
